## CFM 3507 VACUUM

### CFM 3507 Vacuum

The CFM 3507 is a powerful, yet compact unit that is ideal for collection of heavy materials or extremely long runs of pipe and hosing. Small central vacuum systems, process integrated spot suction cleaning, and heavy duty general cleaning are just a few of the applications the CFM 3507 is equipped to handle.

### Features and Benefits

- Regenerative blower with three-phase TEFC induction motor features few moving parts, requiring less maintenance and longer service life.
- Phase indicator and switch make changing phases and rotation much easier and time efficient.
- Large, oversized main filter offers greater surface area to prevent premature clogging, while improving overall filtration efficiency.
- External filter shaker mechanism enables quick and easy purging of main filter, keeping it free of clogging dust, and maintaining the vacuum's performance.
- Standard manometer allows the operator to determine if any of the filters are clogged or if there is a significant loss of performance.
- Swivel locking castors allow for easy transport in tight areas and stability in inclined areas.

### Options and Accessories

- Upstream or downstream HEPA filtration
- Stainless steel construction
- Various filtration media
- Self-purging cartridge filtration
- Polyliner Adapter Kit
- Wet/Dry collection option

## Specifications for the CFM 3507 Vacuum

Data	Units	3507
Voltage @ 60HZ	volts	440-480
Type of Power	phases	3
Power	watts	4,600
Current Draw	amps	7.9
Waterlift, max.	inches of H <sub>2</sub> O	210
Airflow, max.	cfm	225
Protection	IP	55
Insulation	class	B
Filter Area, mainfilter	sq. ft.	21
Filter Area, HEPA*	sq. ft.	64.5
Tank Capacity	Gallons	26
Machine Inlet	mm	70
Dimensions (lxwxh)	inches	46x27x60
Weight	lbs.	319
Cord Length	feet	30
Filter Efficiency, HEPA*	DOP Tested	99.999% @ 0.3 microns
